

2020 SKILL-BASED COURSES

LUMCON is a leader in marine science education distinguished by our passion to help you build a skill-set to make you the best marine scientist you can be.

Course Level: Undergraduate, Graduate, Postgraduate, Faculty

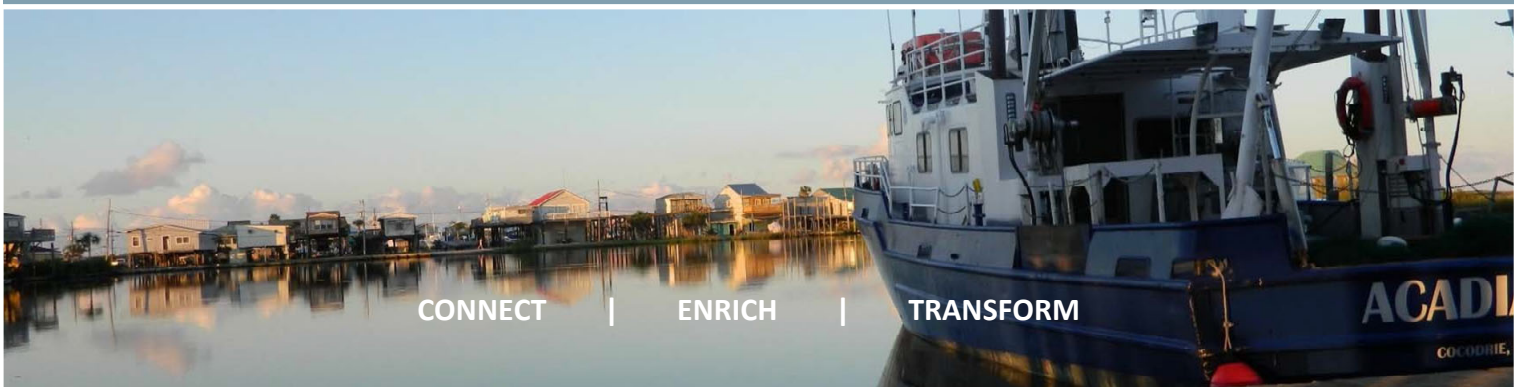

Course Location: DeFelice Marine Center, Cocodrie, Louisiana

- **Small Boat Operations for Marine Scientists: Dates June 29-July 3, 2020 - \$975/person** (includes meals, housing, course fees, certifications) Course Description: Attendees will receive a recreational safe power boating certification from NASBL and an introduction into the best practices of using powerboats in scientific research programs.

- **Scientific Diving Field Camp: July 20-31, 2020 - \$2500/person** (includes meals, housing, course fees) Course Description: This two-week scientific diver field course developed to meet AAUS standards for scientific diver accreditation within research or academic programs. The course is open to the public and researchers needing scientific diver training. The course will meet 8-10 hours daily during the two week period and will include academic course work and testing, pool training in emergency response and diving techniques, and a least 12 dives aboard LUMCON research vessels in the Gulf of Mexico. Diving will be focused on techniques for diving in inshore low visibility conditions, and offshore open ocean structures in the Gulf of Mexico. Participants are required to reside at LUMCOM during the course and must complete all course prerequisites before arrival. Cost is all inclusive, except for transportation to and from LUMCON. An application and list of prerequisites can be downloaded from the website at lumcon.edu/scientific-diving
